13.	6/12	20	
14.	6	53	Pustular psoriasis—Given antibiotics also.
15.	2-6/12	30	Relapse after modified Goeckerman's regime.
16.	3	40	Scabies +
17.	6/12	28	Relapse after modified Goeckerman's regime.
18.	2	34	Case with exfoliative dermatitis.
19.	2	25	Relapse after modified Goeckerman's regime.
20.	3	30	
21.	12	24	Relapse after modified Goeckerman's regime.
22.	6	21	
23.	3	28	Relapse after modified Goeckerman's regime.
24.	4	28	
25.	6/12	21	
26.	8	21	Relapse after modified Goeckerman's regime.

magnesium sulphate injections. It is of special significance to note that in a case of arthropathic psoriasis both the cutaneous and arthritic lesions cleared up with this method of therapy.

#### SUMMARY

Forty-five cases of Psoriasis are analysed with reference to age, sex, duration, familial incidence and aberrant types. Treatment of Psoriasis is briefly reviewed. Various modifications of Goeckerman's regime are described and their relative merits discussed. The place of Androgens in treatment of Psoriasis is indicated. A new form of therapy aimed at counteracting the effect of Cysteine is discussed and twenty-six cases treated by this method are presented. Its value in the treatment of Arthropathic Psoriasis is indicated.

## ACKNOWLEDGEMENTS

We thank the Superintendent, Medical College Hospital for allowing us to publish this paper, Drs. R. Ananthanarayanan, Professor of Bacteriology and Jayarama Panicker, Assistant Professor of Bacteriology, Medical College for their kind help in the presentation of this paper.

Our thanks are also due to Sreemathi Karthyayani Amma, Social Worker, Skin Department, Medical College Hospital, for helping us with the statistics.
