

DO YOU KNOW

1. Eccrine sweat glands are found only in-
 - a) humans
 - b) higher primates
 - c) horses
 - d) pigs
2. Under Wood's lamp, fluorescence is produced by-
 - a) pseudomonas infection of skin
 - b) Microsporium audouinii
 - c) Trichophyton tonsurans
 - d) T. schoenleinii
3. The neurofibromatosis-1 gene has been localised to chromosome-
 - a) 16
 - b) 17
 - c) 18
 - d) 19
4. In x-linked ichthyosis, the level of steroid sulfatase can be assayed in-
 - a) cultured keratinocytes
 - b) fibroblasts
 - c) leucocytes
 - d) scales
5. The cardiac abnormality characteristic of tuberous sclerosis and seen in 50% of cases-
 - a) cardiac fibroma
 - b) congenital rhabdomyomas
 - c) fibrous histiocytoma
 - d) idiopathic heart failure
6. The angry back or excited skin syndrome means-
 - a) a strong positive patch test producing positivity at other patch test sites
 - b) exacerbation of previous CD lesions due to a positive patch test
 - c) irritant reaction at patch test site
 - d) contact urticaria at patch test site
7. "Red neck" or "red man" syndrome means a histamine-like reaction associated with-
 - a) aspirin intake
 - b) intravenous morphine
 - c) intravenous vancomycin
 - d) topical povidone -iodine
8. The median age of onset of skin cancers in xeroderma pigmentosum patients is approximately-
 - a) 8 years of age
 - b) 10 years
 - c) 12 years
 - d) 14 years
9. Modified apocrine sweat glands include-
 - a) breast
 - b) cerumen glands
 - c) Meibomian glands
 - d) Tyson's glands
10. The porphyrias without cutaneous photosensitivity include-
 - a) ALA dehydratase deficiency porphyria
 - b) acute intermittent porphyria
 - c) porphyria cutanea tarda
 - d) hereditary coproporphyria
11. Underlying conditions associated with collodion baby-
 - a) congenital ichthyosiform erythroderma
 - b) Conradi's syndrome
 - c) lamellar ichthyosis
 - d) Netherton's syndrome
12. Lisch nodules of the iris are-
 - a) cystic tumours
 - b) granulomatous nodules
 - c) inflammatory lesions
 - d) melanocytic hamartomas
13. Double contoured, curvilinear, "tram tracks" of calcification are seen in the skull x-ray in-
 - a) giant-cell arteritis
 - b) sarcoidosis with metastatic calcinosis
 - c) Sturge-Weber syndrome
 - d) tuberous sclerosis
14. Pathergy is seen in-
 - a) Behcet's syndrome
 - b) leukocytoclastic vasculitis
 - c) pyoderma gangrenosum
 - d) Sweet's syndrome
15. Lofgren's syndrome means-
 - a) acute presentation of sarcoidosis
 - b) cryoglobulinemic vasculitis
 - c) erythropoietic protoporphyria
 - d) giant cell arteritis
