

DO YOU KNOW?

1. The receptor through which the HIV virus enters the cell during initial infection
 - a. CD8
 - b. CXCR-4
 - c. CC-CKR-5
 - d. CD 95
2. Syphilis brephotrophica refers to syphilis transmitted
 - a. by sexual abuse of children
 - b. in HIV infected children
 - c. in utero
 - d. while performing baby care
3. Vitiligo is frequently observed along with
 - a. Basal cell carcinoma
 - b. cutaneous angiosarcoma
 - c. melanoma
 - d. squamous cell carcinoma
4. Painful tumours of the skin include
 - a. angioliopoma
 - b. dermatofibroma
 - c. eccrine spiradenoma
 - d. granular cell tumour
5. Neurofibromatosis-II includes
 - a. bilateral acoustic neuromas
 - b. few cafe-au-lait spots
 - c. few cutaneous neurofibromas
 - d. Lisch nodules
6. Ground pepper sign means
 - a. hyperpigmentation associated with malnutrition
 - b. pigmented cartilage particles in joints in alkaptonuria
 - c. pigmentation due to application of oils
 - d. punctate keratoses due to arsenic
7. Voigt's or Fitcher's lines represent
 - a. a dorsoventral line of demarcation along the lateral edge of biceps
 - b. hyperpigmentation along nail folds
 - c. median truncal pigmentation
 - d. nasal transverse hyperpigmented streak
8. Pseudo-ochronosis is seen with
 - a. carbolic acid application
 - b. chloroquine
 - c. quinine
 - d. topical picric acid
9. In UV light deficient climates, rickets is more common in
 - a. blacks
 - b. caucasians
 - c. mongolian races
 - d. equally in all races
10. Eosinophilic spongiosis may be the early and/or sole histologic finding in
 - a. bullous pemphigoid
 - b. herpes gestationis
 - c. pemphigus foliaceus
 - d. pemphigus vulgaris
11. In psoriasis, cyclosporine acts primarily through
 - a. blockage of keratinocytes
 - b. blockage of T cells
 - c. inhibition of Langerhan's cells and monocytes
 - d. inhibition of migration of neutrophils into epidermis
