

DO YOU KNOW?

1. Hobnail cells, which are found in angiolymphoid hyperplasia with eosinophilia, (AHE), are-
 - a. closely packed cells in lymphoid follicles
 - b. eosinophilic infiltrates in the skin and other organs
 - c. plump endothelial cells
 - d. polytypic B lymphocytes
 2. Epulis gravidarum means pregnancy with-
 - a. bleeding and hypertrophy of gums
 - b. hyperpigmentation of aeorlae and genitalia
 - c. pyogenic granuloma of gum
 - d. soft papillomas of neck
 3. A strong association with a cat scratch or bite has been found in-
 - a. bacillary angiomatosis
 - b. Buruli ulcer
 - c. Oroya fever
 - d. Tsutsugamushi fever
 4. Acroangiodermatitis of Mali is seen in patients with
 - a. acral arteriovenous hemangioma
 - b. chronic venous insufficiency
 - c. erythema multiforme
 - d. Kaposi's sarcoma
 5. The components of Kasabach-Merritt syndrome include-
 - a. chronic consumption coagulopathy
 - b. large hemangiomas
 - c. thrombosis and emboli
 - d. thrombocytopenic purpura
 6. The glomus cells in glomus tumours are-
 - a. endothelial cells
 - b. fibroblasts around Sucquet-Hoyer canals
 - c. pericytes
 - d. modified smooth muscle cells
 7. Scleredema adultorum is associated with all except-
 - a. infections
 - b. multiple myeloma
 - c. paraproteinemia
 - d. UVA radiation
 8. Focal acantholytic dyskeratosis occurs in all except-
 - a. Grover's disease
 - b. keratosis follicularis
 - c. melanocytic nevi
 - d. pemphigus foliaceus
 9. Dioscorea mexicana (Mexican yam) is a rich source of -
 - a. Podophyllin
 - b. psoralens
 - c. retinoids
 - d. steroids
 10. Pharmacologic treatment of leiomyomatosis cutis includes all except-
 - a. analgesics
 - b. beta blockers
 - c. calcium channel blockers
 - d. nitroglycerin
