

NOTES ON NEW PREPARATION

' TERFLUZIN '

May & Baker (India) Private Ltd. announce the introduction of " TERFLUZIN " brand Trifluoperazine.

Trifluoperazine is a highly active piperazine phenothiazine derivative which has been shown experimentally to have, to an even more marked degree, many of the pharmacological properties found in other psychocorrective phenothiazine derivatives. It has been found clinically effective in the treatment of mild mental and emotional disorders, various psychotic illnesses and acute alcoholism. Trifluoperazine is also an extremely powerful anti-emetic.
